

A photograph showing a male optometrist and a female patient using a Canon CR-2 eye scanner. The optometrist is on the left, looking at a tablet displaying a retinal image. The patient is on the right, looking into the scanner. The machine is white and has 'Canon' and 'CR-2' printed on it.

North West London Diabetic Eye Screening Programme

What is diabetic eye screening?

The North West London Diabetic Eye Screening Programme was formed on the 1st November 2015. It serves the diabetic population of Brent, Ealing, Hammersmith & Fulham, Harrow, Hillingdon, Hounslow, Kensington, Chelsea & Westminster.

For patients referred to the programme by their General Practice, we are responsible for inviting, screening, grading & referring to the Hospital Eye Services as required.

The programme engages a large team of qualified screeners & a number of community optometrists who are contracted to assist.

The programme has almost 130,000 patients with diabetes and is the largest programme in London. We can offer patients appointments at numerous different venues in North West London.

If you live in any of the boroughs mentioned above and would like to book an appointment to have your eyes screened, please call our booking office on +44 (0) 208 099 1122
